- At the end of this symposium, the participant will be able to:
- Learn about clinical updates and practical considerations in clinical topics, including vaccinations for children and autoimmune serology
  - Evaluate the evolving practices, enablers and barriers in the management of infertility
  - Explore and review the roles of various treatment options and management concepts for common medical and surgical conditions such as diabetes, kidney stones, abdominal pain, chest pain and wound care
  - Describe the challenges and opportunities for health services in meeting the needs of elderly patients with non-iron deficiency anaemia
  - Analyze evolving collaborative practices for community physicians in the area of mental health using concepts of Cognitive Behavioural Therapy
